Funding Announcement

September 1, 2019
Aylmer, ON

ETBO Tool & Die Inc. is pleased to acknowledge financial support from the Government of Canada, via the Women Entrepreneurship Fund. ETBO Tool & Die Inc. operates in the automotive industry, a just-in-time market. As a business partner committed to on-time performance, ETBO maintains power redundancy to ensure the plant is always able to meet the needs of its customers, even during power disruptions. This funding is being used to expand our back-up power generation contingent by sourcing a new, additional natural gas generator. Our thanks and appreciation are extended to the Ministry of Small Business and Export Promotion, Government of Canada.
